Professional Experience

WordPress Development | FIVERR Freelancing Khanewal, Pakistan

2 years of experience in custom WordPress development handling multiple Web development projects.
Did API Integration in WordPress for one project:

→ [Lot2you Automotive Finance](#) (Integrated API on the search filter for this website)

Some of the WordPress projects that I've been working on includes:

→ [Admission Section](#) (An admission & scholarship website for student in Pakistan and foreign)

→ [BrandSea](#) (An E-commerce for clothing niche)

→ [GreyWomen](#) (Another E-commerce store for a Pakistani clothing brand named "grey women") And many more!

Associate Software Engineer | Devsinc (Internship) Lahore, Pakistan
Software house handling multiple Web and App development projects, located in DHA Phase-5, Lahore.

Front-End Developer: July 2022 – Aug 2022

— Handled front-end's of multiple App projects using **HTML, CSS, JS, REACT, VueJS**, developing high quality designs. Some of the client-based personal projects that I've been working on includes:

→ **Markdown Previewer** (It's a pretty simple Vue app created through the Vue create CLI tool. After that it uses the marked library to parse the inputted text. The styling and CSS is all done by yours truly, with a color palette stolen from the Vue.js docs. Lastly, the export options were added as a bonus feature to give it some actual usability, tied together with custom logic and the File Saver library)

→ **A Drum Machine** (A ReactJs Drum machine)

→ **Stacker News** (A clone of Hacker news that I coded with a modern JavaScript stack that I like to call GARP Stack; GraphQL Yoga, Apollo Client, React and Prisma)

- ➔ **RORBook** (App where likeminded people can meet and search each other using ROR as a backend and HTML,CSS,Bootstrap,Jquery as a frontend technologies)
- ➔ **Jammming** (A ReactJs app that uses Spotify API to search Spotify library, create a custom playlist and save the playlists to the Spotify account)
- ➔ **Conway's Game of Life** (A single page application I built to stimulate Conway's game of life. It was developed in **React** and uses **Redux** for passing data around. Webpack was used to package the application and **Ant.Design** was used for the application UI)

Extracurricular & Volunteer Experience

WordPress Workshop

Multan, Pakistan

— *Organizer and Introducer:* It was an online workshop in which brief the audience about this platform (2022).

— About 50-7- people attended that workshop.

Ruby On Rails (ROR)
